INSTALLATION INSTRUCTIONS

- **Safety Instructions:**

- Turn power OFF or unplug fixture and allow it to cool before replacing lamp.
- Lamp gets HOT quickly. Contact only switch/plug when turning on.
- Do not touch hot lens, guard, or fixture housing until it has cooled.
- Keep lamp away from combustibles.
- The inner module is very hot, do not touch it until it cools down
- Do not operate the fixture fitting with a missing or damaged shield.
- For outdoor use only.
- Make sure the power is turned OFF before installing or servicing this fixture.

- **Installation Instruction:**

- Disconnect the transformer from the main supply
- Remove the shield from the retaining housing
- Assemble the internal mold into the lamp and connect it with a connector (if required)
- Install the cover and rotate the cover on the housing to fix it on the fixture housing to make sure the leak hole is in the middle and down
- Connect the cable to the main line through the ground plug
